

Cambridge University Engineering Society (CUES)

The Cambridge University Engineering Society (CUES) is a student-run, University-wide society with over 1,000 active members and several thousand alumni. Founded in 1901, our mission is to provide opportunities for our members to explore the wider world of engineering, as well as connecting them with other students in Cambridge and beyond.

For membership details please visit the [CUES website](#). Membership entitles you to attend a wide-range of events, including: lunchtime presentations from leading tech companies, hands-on workshops, hackathons, alumni mentoring and mock interviews, as well as social events such as annual dinners, garden parties and international trips. You will also be eligible to apply for CUES grants to build projects and pursue engineering-related activities. Each year, CUES also organises the largest student-run careers fair at the University in Michaelmas term.

All CUES events are free, or heavily subsidised, thanks to our industry sponsors, including AECOM, Arm, Rolls-Royce, P&G and many more. Members also have unlimited access to our digital magazine, "The Cambridge Engineer", along with weekly email bulletins about our events and relevant opportunities such as internships, graduate openings, awards, and scholarship programmes.

To join you will need to visit the [CUES website](#) where you can also find more information about the society.
